
Company

Menhir Photonics is a dynamic Swiss laser manufacturer offering laser solutions of unprecedented robustness and reliability to our customers around the globe. Based in Switzerland, our team has strong expertise in the development and production of ultrafast lasers for the markets of aerospace, telecom, and metrology. For our development and production site near Zürich, we are looking for a **Senior Production Manager**.

Mission

You will work in the laser production department in order to optimize the production processes and the quality/control procedures. You will closely interact with other functions within the company: Electrical & Mechanical Engineering, Laser Engineering, Purchasing Department and the company management team. You will be responsible for:

- The production and quality assurance of laser systems.
- The standardization of the production processes.
- The improvement of quality assessment and control processes by incorporating novel technologies.
- The transfer of novel R&D developments into the production pipeline.

Profile

- You have a degree in engineering, physics or a comparable education and +5 years experience in an industrial environment.
- You have a proven background in the industrialization of photonics products. Ideally, you have knowledge in the field of lasers and laser production including cleanroom operation.
- You are a team player and like working in very dynamic team in a fast-growing business environment.
- You are willing to take responsibility, work independently and approach problems in an analytical way. You are communicative and a team leader.
- Thanks to our global operation, excellent knowledge of English language is mandatory. Knowledge of German language is also preferred.

Conditions

- The position offered is a full-time position.
- Location will be at our Zurich production center.
- Preferred starting date will be March 2020.
