
Company

Menhir Photonics is a dynamic Swiss laser manufacturer offering laser solutions of unprecedented robustness and reliability to customers around the globe. Based in Zurich, Switzerland, our team has strong expertise in the development and production of ultrafast lasers for the markets of aerospace, telecom, and metrology. For our development and production site near Zurich, we are looking for a **Senior Laser Engineer**.

Mission

You will work in the laser development department with focus on product development, testing, quality assurance and application demonstration. You will closely interact with other functions of the company such as Electrical & Mechanical Engineering, Production Engineering, and the company management for continuously improving the laser products and demonstrate new applications. You will be responsible:

- The management of new laser development projects.
- The transfer of R&D projects into the production.
- The quality assurance of laser systems.
- The development and management of an application center with Menhir Photonics' products.

Profile

- You have a **PhD** in engineering, physics. You have **> 5 years of industrial experience** in the field of ultrafast lasers and lasers assembly including experience with working under cleanroom conditions.
- You are a team player and like working in very dynamic team in a fast-growing business environment. You are willing to take responsibility, work independently and approach problems in an analytical way.
- Thanks to our global operation, excellent knowledge of English language is mandatory. Knowledge of German language is also preferred.

Conditions

- The position offered is a full-time position with starting date by end 2021.
- The workplace is located at our development and production site near Zurich (Glattbrugg).
